Chemical Engineering Projects

Reaction Simulator <i>reactionsimulator.vercel.app</i> 2024 – Present - Real-time concentration and conversion simulator for CSTR, PFR, and reactors in series - Arrhenius-based temperature-dependent rate modelling and visualisation - Turns reaction engineering and thermodynamics theory into an interactive learning tool JavaScript · Python · Flask · Vercel	Fugacity Simulator <i>fugacity-simulator.vercel.app</i> 2024 - Fugacity calculations from Peng-Robinson and van der Waals equations of state - Automatic generation and plotting of vapour-liquid equilibrium phase diagrams Python · NumPy · Matplotlib · Flask
Process Design Game <i>process-design.vercel.app</i> 2024 - Interactive simulator for optimising distillation columns, heat exchangers, and reactors - Scoring system giving real-time feedback on energy efficiency and economic metrics JavaScript · Canvas API · Python	Linear Programming Diet Optimisation <i>Academic project</i> 2024 - LP model producing a minimum-cost diet under nutritional constraints - Applied engineering optimisation methods to everyday life systems Python · SciPy · PuLP
Apple Supply Chain Analysis <i>Academic project</i> 2024 - Risk analysis of semiconductor and materials supply chains with numerical bullwhip-effect simulation - Derived data-driven SCM optimisation strategies and produced a visual report Python · Pandas · Excel	

Software Projects

LifeOS — Personal Productivity OS <i>lifeos-wine.vercel.app</i> 2024 – Present - Full-stack personal operating system unifying habits, goals, finances, and study - Built AI-connected automation; in active use by real users Next.js · TypeScript · PostgreSQL · Vercel	CNN Emotion Classifier <i>Personal project</i> 2024 - Trained a CNN for real-time facial expression recognition - Built an emotion-driven UI colour adaptation system Python · TensorFlow · OpenCV
GLEAM — Student Council Governance Platform <i>samsunggleam.vercel.app · Global Hope Scholars Student Council</i> 2026 – Present - Bilingual (EN/KO) operating platform: member portal with a club → period → event hierarchy, admin governance module, club-report export renderer - Built so the next cohort inherits a working system, not institutional memory — after PALS's constitution and handoff protocol Next.js App Router · TypeScript · Supabase · i18n	Yummz — Student Community Platform <i>yummzsg.vercel.app · International Student Council</i> 2026 – Present - Event and community platform: RSVP flow, organiser portal, opt-in event chat with moderation and scheduled retention jobs - Delivered to a fixed deadline ahead of the autumn planning cycle Next.js · TypeScript · Drizzle ORM · PostgreSQL
